

Dental Assisting

Welcome!

Thank you for choosing the Dental Assisting program. You are entering into a very exciting healthcare field of study: one which will enable you to develop professional skills and be a part of an integrated healthcare team that provides oral care to patients, as well as provide you with opportunities for personal growth. We look forward to meeting you in October and assisting you in achieving your career goals!

Instructor Contact Information:

Wanda MacInnis
902.566.9683
wcmacinnis@hollandcollege.com

Angela MacFarlane
902.566.9553
ajmacfarlane@hollandcollege.com

Clinic Coordinator Information:

Michele McKenna
902.566.9507
mmckenna@hollandcollege.com

Health & Community Studies Unit Secretary:

Barb Boss
902.566.9564
hbboss@hollandcollege.com

Class Start Date & Time:

October 13, 2020 – First Day of Classes
9:00 a.m.

Christmas Break:

Last day of class for Semester 1: December 11, 2020
Semester 2 Begins: January 6, 2021

February Break:

February 22-26, 2021

Location of Classroom:

Charlottetown Centre, Prince of Wales Campus
Room 117E

Practicum Dates:

Practicum I: Feb. 15 - 19, 2021 (1 week)

Practicum II: June 28 to July 23, 2021 (4 weeks)

Booklist: Book lists are broken down by semester and are available at the bookstore. You will receive this list on the first day of class. Students are cautioned not to buy any books prior to orientation day without checking with an instructor first. Some of the required books may be new editions. All books are available at the Holland College Bookstore.

Materials: Standard uniforms, socks (must be solid with no patterns) colored or white is preferred, a white lab coat, clinic shoes (must be puncture resistant *no canvas* to be worn inside the clinic only), protective eyewear, and a basic calculator. All materials are available at the Holland College Bookstore, or you may also purchase these materials from other stores.

Change in Delivery Format for Fall 2020

In response to the global pandemic, Holland College will be delivering programs primarily through a blended learning approach in the fall semester, with the intent to resume face-to-face program delivery in January 2021. Some programs will begin using distance delivery for the fall semester (September-December 2020), some will offer a blended delivery model for the fall semester, while others will be impacted by delayed start dates. Decisions have been made on a program-by-program basis.

In the Dental Assisting program, a blended delivery format is being planned for fall semester. This means that any courses (or components of courses) that are theory-based will be offered through distance delivery (online), and only when necessary, will assessments or technical skills be delivered on site (at the Charlottetown Centre, Prince of Wales campus). You will be advised by your instructor at the beginning of each course, which assessments will be done through distance and which ones will take place on-site.

Appropriate safety measures such as: ensuring that the guidelines for physical distancing are adhered to, and that students and instructors are equipped with the proper personal protective equipment (PPE) will be in place for any on-site activities/assessments. As an added precaution, the college has implemented stringent cleaning and sanitizing processes.

Since, in the fall semester, most courses in the Dental Assisting program are theory-based, content delivery and assessment of learning (projects, assignments, and quizzes) will be conducted primarily online. Learning activities will involve a variety of formats, as decided by

the instructor. These could include attendance at virtual classroom sessions, online discussion forums, video assignments, online tests, blogs, independent study, etc.

While the blended delivery model provides an opportunity to exercise more flexibility and freedom in planning/scheduling the learning activities, learning online will involve a significant amount of independent study and research. Therefore, skills related to time-management, problem-solving, and effective communication will need to be demonstrated.

The following is a list of the minimum technological requirements for participation in the blended delivery model:

Student Hardware and Software Needs

Note: These are general requirements for students to participate in blended and distance courses.

- 1.** A desktop or laptop computer. Either a Windows-based PC with Windows 10 or a Mac with macOS Catalina 10.15 or higher. Processor: Intel i3 minimum with i5 or higher recommended. RAM: 4 Gb minimum with 8Gb or higher recommended. Storage: 10 Gb storage minimum with SSD disk recommended. Regarding storage – some programs may have higher storage requirements.
- 2.** Speakers/headphones/earbuds with microphone for listening to audio or videos presented in courses. Note: your laptop may have a built-in microphone and speakers, but we recommend an external set for best quality of experience during synchronous activities.
- 3.** A built-in or external webcam for interacting in course activities that require video feedback from students.
- 4.** Google Chrome is the only browser that SAM (the College's LMS) completely supports.
- 5.** Microsoft Office 365. Students have free access to install the suite on their computers, tablets or other mobile devices. A browser-based version is available.
- 6.** Adobe Reader DC.
- 7.** An Internet connection with a minimum download speed of 10Mb/s and an upload speed of 1Mb/s is recommended. A wired connection to your home router is typically preferable to a wireless connection as it provides better stability and performance.
- 8.** Tablets, smart phones, and Chromebooks may allow you to access some course content but have limited functionality and are not recommended.

Internet Connectivity - To test your internet speed, go to <https://www.speedtest.net/> and click the “go” button. A test will take place that measures the speed at which you can upload or download data from the internet from your current location. It is normal for the upload speed to be much lower than the download speed. If necessary, consider asking others in your household to limit their use of devices/internet when you are involved in a ‘virtual’ class session.

The router in your house might send out more than one signal. Many routers broadcast a 2.4Ghz and a 5Ghz signal simultaneously. Connecting to the 5Ghz band is best. If you have an ethernet cable and your computer is situated near your router or modem, you might be able to use a wired connection instead of Wi-Fi for the best connectivity. For more information or help with this, email sam@hollandcollege.com

Congratulations on being accepted into the program! We look forward to working with you starting October 13, 2020. If you have any questions or concerns, please send an email to: student-inquiries@hollandcollege.com

Sincerely,

Dental Assisting Faculty
Prince of Wales Campus
